

Yang Yang

☎ +1-651-210-0440 ✉ yang5276@umn.edu 🌐 st2yang.github.io 📄 github.com/st2yang

SUMMARY

- Experienced in robot learning, computer vision, and machine learning
- Strong programming skills in Python, C/C++, and Matlab
- Fast learner, self-driven team player with good communication

EDUCATION

Doctor of Philosophy, Computer Science *Expected 12/2021*

University of Minnesota (UMN), Minneapolis

Advisor: [Changhyun Choi](#) and [Hyun Soo Park](#)

Dissertation: Target-Driven Robotic Manipulation with Visual Attribute Reasoning

GPA: 3.94/4.0

Graduate student, Engineering Thermophysics *2015 - 2016*

Tsinghua University (THU), Beijing, China

Bachelor of Engineering, Energy and Power Engineering *2011 - 2015*

Huazhong University of Science and Technology (HUST), Wuhan, China

GPA: 91.4/100

SKILLS & COURSES

Programming: Python, Matlab, C/C++, CMake, Linux, Bash, Git, Docker, \LaTeX

Machine Learning: PyTorch, Tensorflow, Keras, scikit-learn, DGL, Ray, Spacy

Robotics: OpenCV, Open3D, PCL, ROS, Gym, MuJoCo, V-REP

Courses: Statistical and Deep Learning, Reinforcement Learning, Computer Vision, Natural Language Processing, Convex and Nonlinear Optimization, Operating Systems, Sensing and Estimation

Model Implementations: CNNs, RNNs, GNNs, Transformer, Classifier with BERT, Model-Free RL, POMDP, SVM, AdaBoost, Structure from Motion, visual tracking and mapping (SLAM), etc

EXPERIENCE

Mitsubishi Electric Research Laboratories, Cambridge, MA *05/2020 - 08/2020*

Research Intern, Host: Dr. Siddharth Jain

- Developed deep reinforcement learning (RL) algorithms for contact-rich robotic manipulation
- Built a hierarchical RL-based policy of deep Q-learning (DQN) and soft actor-critic (SAC) models
- Applied a graph neural network (GNN) based visual state encoder (**deep reinforcement learning, computer vision, GNN**)

Google, Mountain View, CA *07/2018 - 08/2018*

Visual-Inertial System Engineer (contractor), Host: Dr. Stergios Roumeliotis

- Built a visual tracking and mapping (SLAM) system for Phone-based VR
- Wrote a C++ visual RANSAC library for camera pose estimation
- Implemented an image selection algorithm based on multiple RANSAC's (**3D computer vision, SLAM, C++**)

Choice Robotics Lab, Minneapolis, MN *02/2019 - Present*

Research Assistant, Advisor: Dr. Changhyun Choi

- Developed an interactive robotic grasping system with vision-and-language reasoning
- Investigated self-supervised deep learning for robotic perception and manipulation
- Proposed a deep RL-based approach to target-driven manipulations (**robot learning, deep reinforcement learning, natural language processing**)

- Proposed a convex optimization-based approach for UAV motion planning
- Developed an attitude tracking system for gyro-less mobile devices
- Implemented a laser-based localization and mapping system with extended Kalman filter and C++ (robotics, SLAM, optimization)

SELECTED PROJECTS

One-Shot Target Object Detection

- Adapted Mask R-CNN to perform category-agnostic instance segmentation on RGB-D images; achieving 0.763 AP (Fine-tuned Mask R-CNN baseline: 0.385 AP)
- Implemented a Siamese Network trained with triplet loss for target template matching
- Visualized activation maps and t-SNE clustering for analysis (CNN, object detection, metric learning, Tensorflow)

Referring Expression Comprehension and Generation

- Fine-tuned Visual-Linguistic BERT on RefCOCO dataset to localize an image region described by a natural language expression; achieving 0.874 accuracy (SOTA performance: 0.886)
- Implemented a recurrent model (RNN) to generate referring expressions for an image region
- Experimented with different models (LSTM, GRU, Bi-RNN) and overfitting reduction techniques (BERT, RNN, PyTorch)

HONORS & AWARDS

UMII-MnDRIVE Graduate Fellowship, UMN	2020
Departmental Fellowship, UMN	2016
Merit Student Scholarship, HUST	2012 - 2014
National Scholarship, Ministry of Education of P.R. China	2012 - 2014
